Bathing perfection

Style

Give your bathroom that designer feel with Quartz Digital Bath's sleek, modern looks. Temperature perfect baths are dispensed discreetly through the bath overflow filler leaving the bathroom uncluttered and contemporary.

Simplicity

Just one touch is all it takes for temperature perfect bathing. No more fiddling with the taps to find the right temperature.

Technology

The controller's LED lights flash while the water reaches temperature and goes to steady showing when the water has reached the selected temperature. So, all you have to do is pop in the plug and relax while the bath fills safely.

Safety

Quartz Digital Bath is fully thermostatic, and factory set at a temperature of 45°C, reassuring when kids and the elderly are in the bathroom.

Flexibility

Quartz Digital's controller can be located at a convenient height or out of the reach of the children.

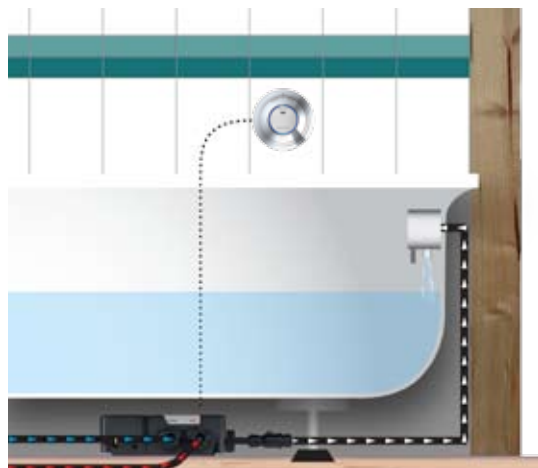

Accessories

For total indulgence why not invest in a dual switch or wireless remote – start the bath from the landing or the bedroom, and soak up the benefits of Quartz Digital Bath!

...bathing made simple

How it works

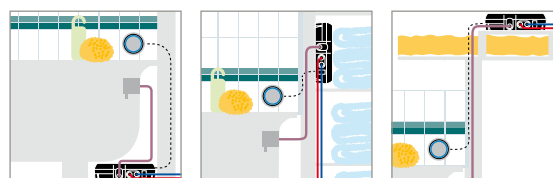

A low voltage data cable connects the controller to the processor. Simply press the controller and the hot and cold water are fed into the processor, where they are blended to the selected temperature and then dispensed through a single pipe to the bath overflow filler.

Siting the processor

The Digital processor which blends the hot and cold water for Quartz Digital Bath and Shower is slimline, compact, smaller than a shoebox and can be sited in any convenient location up to 10 metres from the bath control.

The Digital processor can be sited...

under the bath

in the airing cupboard

in the loft

A total bath and shower solution

Complete your bathroom with Quartz Digital Bath and a Quartz Digital shower of your choice. Or for a perfect overbath solution, team the Quartz Digital Bath accessory kit with a Quartz Digital concealed shower.

Quartz Digital Bath accessory kit

An overbath option

Comprising a Quartz Digital Bath overflow filler and a diverter valve, the accessory kit can be installed with Quartz Digital concealed showers. This allows easy and instant switching between shower and bath.

Bath overflow filler

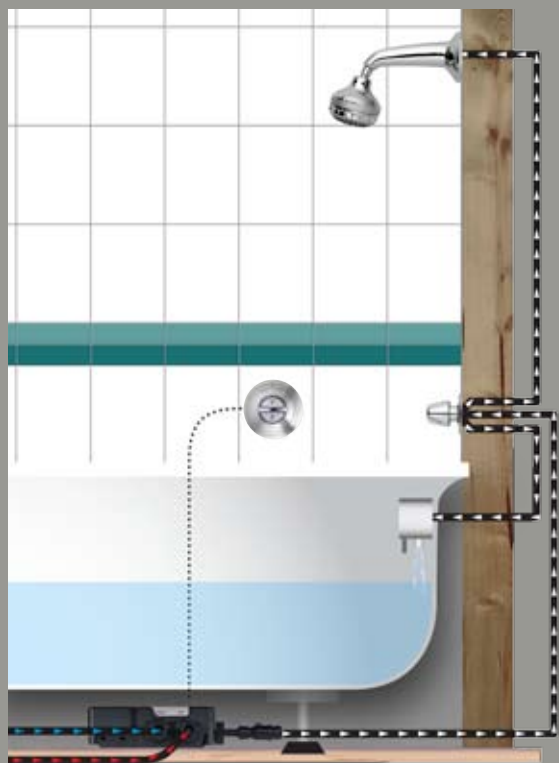

Diverter valve

How it works

As with all Aqualisa Digital products, hot and cold water are blended in the Digital processor, sited in a convenient location, up to 10 metres from the control. For overbath configurations, using the Quartz Digital Bath accessory kit, simply press the control to switch on, then twist the diverter to select a bath or shower.

Quartz Digital Bath accessory kit shown with Quartz Digital concealed shower with adjustable height head, and a Digital wireless remote.

Quartz Digital accessories

Quartz Digital dual switch
Operates Quartz Digital Bath and Shower via a data cable, and can be located up to 10 metres from the processor.

Digital wireless remote
This handy remote is battery less and wireless and operates Quartz Digital Bath and Shower up to 10 metres from the processor.
