

THE RETRO RANGE

Strebel Limited offers the RETRO range of steel column radiators, celebrating the styles of a past era, the styling of these radiators has once again become popular within the UK.

A range of 2-6 columns, with heights between 220mm – 3000mm provides every possible combination to offer a stylish, yet subtle heating option. The vast choice available extends to all regular RAL colours, so they can even be tailored specifically for an individual room.

The rounded top to each column provides an attractive, yet safety-conscious environment to your selection, with secure brackets for either floor or wall-mounting options. Peace of mind is part of the benefit in selecting the RETRO style.
