

VALOR FIRES

FARNHAM ADDENDUM

This addendum is for the Model 819 Farnham stove. It must be read in conjunction with the installer and owner guide supplied with the stove.

Why?

The Installer guide supplied with the stove does not make reference to the 'ON / OFF' switch fitted to the rear of the stove or the loose packed door handles.

'ON' / 'OFF' switch.

1. There is a switch located on the upper rear of the stove. This is an 'ON' / 'OFF' switch. For the stove to operate this needs to be in the 'ON' (I) position (See figure 1).

Fitting the door handles.

1. The stove is supplied with loose packed door handles. To fit these the window must be removed. To do this, remove the four window retaining clamps using a number 1 sized phillips / crosshead screwdriver. The washers supplied with the handles are to be fitted on the screw side of the door. After fitting the handles replace the window and clamps.
