## FUEL EFFECT ADDENDUM

This addendum is for the Model 823. It must be read in conjunction with the installer and owner guide supplied with the fire.

### WHY?

The loose coal pieces on the Blenheim model have been replaced with a one piece fuel effect.

**Page 4** - Replace reference to the Blenheim model with the following.

<u>Heater</u>	<u>Heat engine</u>	<u>Complete Fascia</u>	<u>Spacer</u>	<u>Fuel effect</u>
Blenheim	5.5	4.58	N/A*	0.72

**Page 7** - The table shows a bag of loose coals - The text next to this should read ' All models except Blenheim and Seattle'.

**Page 15** - Replace the 'Fitting the fuel effect' with the following.

### Fitting the fuel effect.

#### Seattle and Blenheim models.

1. This model is supplied with a one piece fuel effect. Remove the fuel effect from its packaging and place it on top of the fuel support.

#### Knightsbridge, Westminster and Luxor models.

##### Important notes.

- The coal pieces supplied are a natural material. Occasionally it will be necessary to reduce the size of the coal pieces. To do this place them inside a plastic bag, place on a suitable hard surface and tap gently with a small hammer or similar tool.
- **The coals are for decorative purposes only. There is a choke risk to young children. Make sure they cannot gain access to them.**

1. Place the loose coals onto the fuel support (a glove is provided with the coal pack). It is not necessary to use all the coal supplied.
