INSTALLATION GUIDE

SAFETY

- Always read this guide in conjunction with the guides supplied with the heater.
- Always switch off electric power when not needed.

HANDLING AND UNPACKING

Before continuing any further with the installation of this surround and hearth please read the following:

Important instructions.

- The approximate lifting weight of the surround and heater assembly is 32.5 kg.
- One person should be sufficient to lift the surround and heater assembly. If for any reason this weight is considered too heavy then obtain assistance.
- When lifting always keep your back straight. Bend your legs and not your back.
- Avoid twisting at the waist. It is better to reposition your feet.
- Avoid upper body / top heavy bending. Always bend from the knees rather than the waist. Do not lean forward or sideways whilst handling.
- Always grip with the palm of the hand. Do not use the tips of fingers for support.
- Always keep the Surround or Hearth as close to the body as possible. This will minimise the cantilever action.
- Use gloves to provide additional grip.
- Always use assistance if required.

UNPACKING THE SURROUND ASSEMBLY

The lower fascia trim, fixing kit, coals and installer guide for the heater are supplied in the back of the surround. Remove these before locating the surround assembly.
