Publication No. ZZ1225-3 May 2008

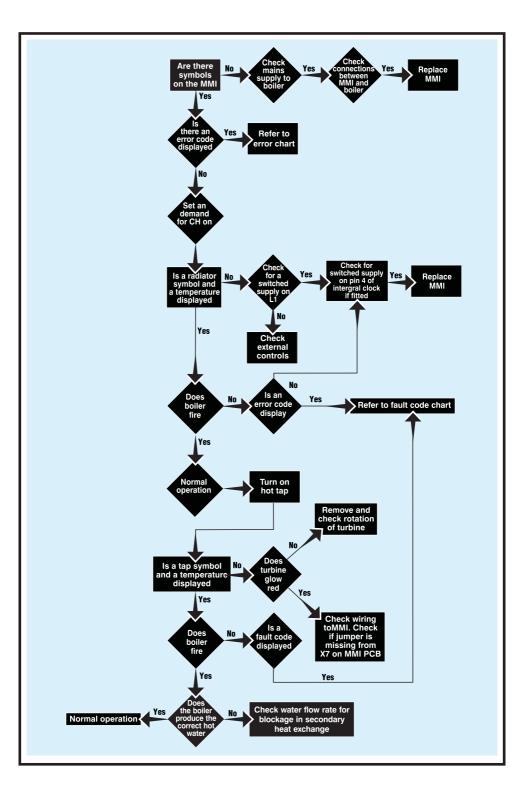

The Reno Service Engineer's Guide

High Efficiency Combination & System Boilers & RenoXtra High Efficiency Combination Boilers

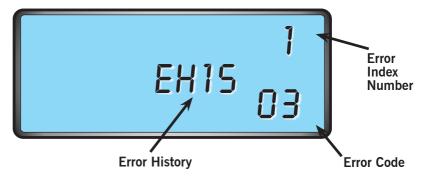

| CODE | FAULT | REASON | ACTION |
|-------|--|--|--|
| N1/A | D 11 11 1 | | Check all external controls if fitted. |
| N/A | Boiler will not run. | No call for heat to boiler control board. | Check settings of the time clock. |
| | | | Check settings of boiler controls. Check water flow from appliance is correct. |
| | | No call for DHW to boiler control board. | Check cold water-inlet filter. |
| N/A | No DHW output. | No, or reduced, water flow. | Check the wiring to the flow sensor. |
| | | No, or roduced, water new. | Check operation of the flow turbine. |
| | | | Check gas supply and gas cock. |
| 01 | Flame lockout after several | Flores not detected | If burners are alight, check flame sensor and wiring to |
| 01 | ignition attempts. | Flame not detected. | control board. |
| | | | Check operation of gas valve. |
| 02 | False Flame | N/A | |
| 03 | High water temperature limit. | Air in boiler. | Vent boiler. |
| 00 | riigii watoi torriporataro iirriit. | No water flow. | Check pump. |
| 05 | No tacho from fan. | Fan not running or wiring faulty. | Check that fan runs. |
| | | | Check wiring between control board and fan. |
| 07 | High flue gas temperature. | Poor heat exchange into water. | Check heat exchanger insulation pad. |
| | 0 0F=:===== | J | Check heat exchanger for magnetic build up. |
| 08 | Flame circuit error. | Flame sensing lead shorted to earth. | Check flame detection lead between sensing probe and ignition control board. |
| 00 | Valve driver circuit error. | Can valve not detected | 3 |
| 09 | vaive univer circuit error. | Gas valve not detected. | Replace ignition control board or gas valve |
| | Flow return sensor calibration | During calibration period flow and return sensors do not come within | Sensors not connected to pipes. Zone valves preventing water flow through boiler. |
| 11 | error. | 3°C within the maximum 5 minute | No bypass fitted |
| | GITOI. | time period. | Faulty sensors. |
| 10-25 | Internal control board fault. | amo ponou. | Replace main control board |
| 10 20 | internal control board ladit. | Flame sensing error. | Check flame detection lead between sensor and ignition |
| | Flame signal lost 5 time in 4 | Falling gas pressure. | control board. |
| 26 | minutes. | Fan fault. | Check gas supply, does pressure fall when boiler fires. |
| | | Flue blockage | Check that flue system is not blocked. |
| 30 | Boiler flow temperature | Temperature sensor shorted to earth | Check wiring and connections for shorting to earth. |
| 30 | sensor short circuit | or failed. | Check sensor resistance. |
| 31 | Boiler flow temperature | Temperature sensor not connected | Check wiring and connections. |
| 01 | sensor open circuit. | or failed. | Check sensor continuity |
| 32 | DHW temperature sensor | Temperature sensor shorted to earth | Check wiring and connections for shorting to earth. |
| | short circuit. | or failed. | Check sensor resistance. |
| 33 | DHW temperature sensor | Temperature sensor not connected | Check wiring and connections. |
| | open circuit | or failed. | Check sensor continuity. |
| 34 | Low mains supply voltage. | Electrical supply fault to property. | Check incoming mains supply and wiring to appliance. |
| | 1 1 1 | Faulty wiring to appliance. | Poilor power cupply chould be checked by a qualified |
| 35-36 | Power supply fault. | No fault on boiler. | Boiler power supply should be checked by a qualified electrician. |
| | | | Check system pressure on dial gauge and if correct check |
| 37 | Low supply water pressure. | Water pressure low or sensor failed. | pressure sensor and wiring. Re pressurize system. |
| | Open therm sensor (if fitted) | Short circuit in wiring between sensor | Check wiring to sensor. |
| 39 | shorted to earth. | and control board. | Check the electrical resistance of the sensor. |
| | | | Check cold system pressure. |
| 40 | High evetom water process | System water pressure too high. | Check expansion tank change pressure with system pressure |
| 40 | High system water pressure. | Pressure sensor failed. | release. |
| | | | Check pressure sensor. |
| 43 | Boiler return temperature | Temperature sensor shorted to earth | Check wiring and connections for shorting to earth. |
| .0 | sensor short circuit. | or failed. | Check sensor resistance. |
| 44 | Boiler return temperature | Temperature sensor not connected | Check wiring and connection. |
| | sensor open circuit. | or failed. | Check sensor continuity. |
| 45 | Flue gas temperature sensor | Short circuit in wiring between sensor | Check wiring to sensor. |
| | short circuit | and control board | Check the electrical resistance of the sensor |
| 46 | Flue gas temperature sensor open circuit | Temperature sensor not connected or failed | Check wiring connections. Check sensor continuity. |
| | оры ынын | No connection between MMI and | Check wiring and plug connections. |
| 99 | Communication Error. | CVBC. | There should be 4 plug connectors to MMI, X2, X3, X5 and C1. |
| | | 0100. | There andulu be 4 plug confidences to wilvii, AZ, AB, AB aliu CT. |

Error History Mode

When button is pressed error history mode will be entered. Besides the standby information the following information is displayed on the MMI.

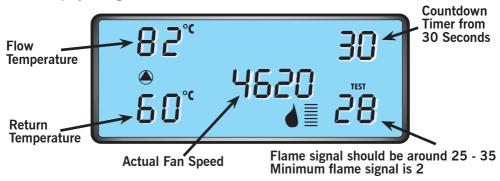

Pressing the up and down arrows will scroll through the error codes.

Error index number 1 is the most recent error.

NOTE all heaters will have errors in there history, as this is part of the functional testing during manufacture.

Test Mode

To enter Test Mode press the Down Arrow and mode buttons simultaneously until the display changes.

Pressing the UP arrow will cause the fan to run at maximum speed.

Pressing the DOWN arrow will cause the fan to run at minimum speed.

Pressing the RESET button will exit test mode to standby.

Test mode will overide all external and internal controls except the high temperature limit.

The maximum fan speed for all models is 4620 this will give the HE30C DHW gas input on both the HE25S and HE25H.
