## High Efficiency Boiler

The new **RenoXtra** from **Johnson & Starley** now offers all the benefits of the renowned Reno HE Combination Boilers plus the new gas saver module.

A one-piece stylish front finish and simple installation makes the **RenoXtra** the choice for installers and their customers.

**Xtra** Savings on system efficiency

**Xtra** Savings on DHW gas consumption

**Xtra** Savings on carbon emissions

**Xtra** Flow rate for DHW

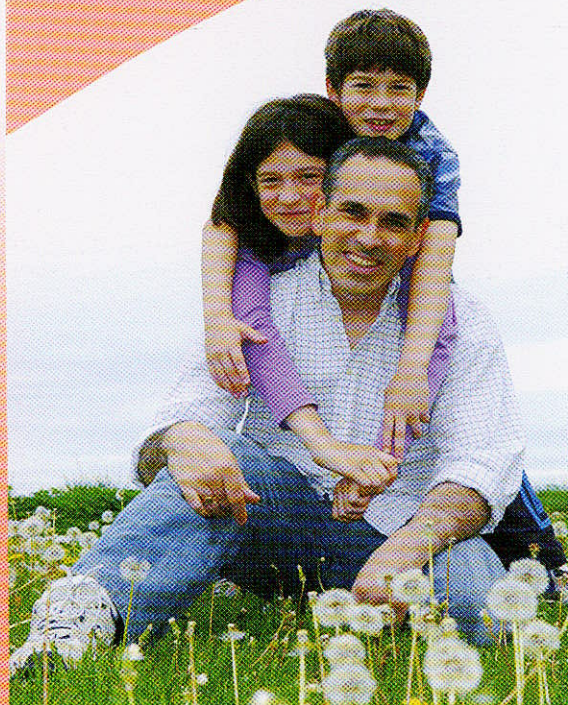

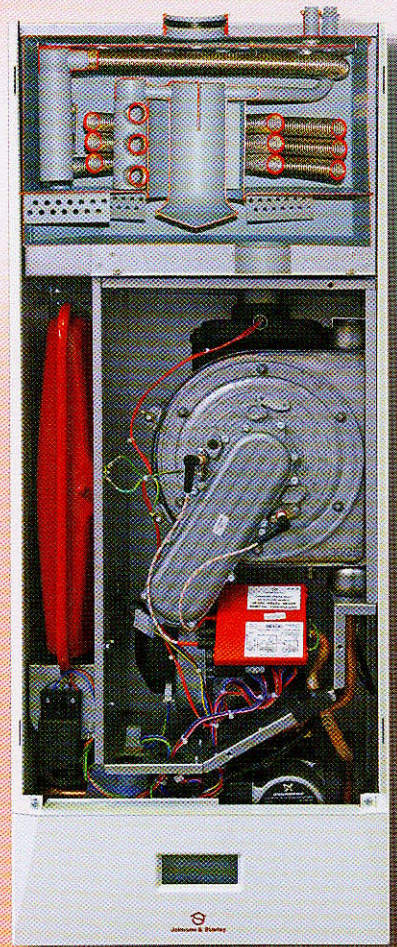

**Xtra** Merits for SAP ratings

**Xtra** Reductions in plumbing

### Gas Saving

The gas saver works by re-cycling flue gas heat, which is normally wasted and expelled to the atmosphere, extracting virtually all the energy. Reclaimed energy is stored in the unit and used to pre-heat the incoming cold water. This results in more efficient hot water.

Testing to BSEN 13203 has demonstrated additional savings of approximately 11% in summer mode and up to 40% in winter mode when the central heating demand produces more condensate. Flue routing of the **RenoXtra** is completed using standard kits, which are supplied as standard with the RENO range.

## Gas Saver Module

- \* Flue creates condense inside the Gas Saver
- \* Heat is transferred to the domestic cold feed supply to the boiler
- \* Temperature of the boiler cold feed supply is raised
- \* The amount of gas required to heat the DHW is reduced
- \* Flue temperatures are reduced therefore plumbing is reduced

RENOXTRA DIMENSIONS		
MODELS	30C	37C
POSITION	WALLHUNG	
FLUE TYPE	FAN ASSISTED	
FLUE POSITIONS	TOP	
HEIGHT (mm)	1044	1044
WIDTH (mm)	425	425
DEPTH (mm)	300	300
WEIGHT (kg)	60	62
