

Taking comfort further

WATERBASED UNDERFLOOR CONTROL

Heating&Cooling

IN ONE

- :: Heating and cooling control for true comfort
- :: Humidity sensor to prevent condensation on floors
- :: Energy saving comfort with adaptive function
- :: Area control for easy operation
- :: Flexible installation for wired and wireless connection
- :: Network communication for large applications
- :: Easy installation with plug and lead connections
- :: Optional weather compensation

Precise control, optimal comfort and low energy consumption

WLM2 control system from OJ Electronics has been developed to provide a temperature control system for room heating and cooling. Integrating heating and cooling in one, the system ensures precise control of room temperature, maximum comfort and low energy consumption – even in large applications.

PROGRAMME

Masters

8 outputs for thermal actuators

8 outputs for thermal actuators and weather compensation

Expansion module with 6 outputs for thermal actuators

Room Sensors

Standard

Standard with function selector

Standard with function selector and floor sensor

Non-adjustable

Room Controller

4-event timer controller
