67mm Sling (S322-67mm)

Novopress offer alternative slings for use on different press systems. As such we have to reinforce the following instruction.

Where **67mm slings** are required for crimping XPress Copper and XPress Carbon fittings, installers must only use the Novopress sling reference 36516-01, marked "**WOESTE Yorkshire 67**" as this is the correct profile for our XPress Press-fit **67mm** fittings. See image below.

Under no circumstances should any other brand of sling be used with our **67mm** fittings as these will lead to an incorrect crimp resulting in an immediate joint failure and invalidate the Pegler Yorkshire Warranty.

XPress **67mm** fittings that have inadvertently been crimped with the wrong brand of sling **cannot** successfully be re-crimped with the "**WOESTE Yorkshire 67**" sling and unfortunately will have to be cut out and replaced with a new fitting using the correct sling.
