

PRODUCT DIMENSIONS

IMPORTANT

The dimensional information given below is to assist you in your choice of appliance. It is not intended to provide all the information that may be required for installation purposes. This can be obtained from your retailer or by viewing/downloading the full installation manuals.

OPEN FRONTED STUDIO FIRES

Appliance dimensions (mm)

Dimension		Studio 1	Studio 2	Studio 3
Α	Gather width	664	864	1254
В	Gather top	250	250	325
С	Gather taper	207	307	465
D	Base width	635	835	1225
E**	Box width	660	860	1250
F	Max. lintel width	130	130	130
G	Gather depth	187	187	187
H**	Box height	334	334	334
l*	Base height	133	133	133
J	Base depth	130	130	130
K	Base	182	182	182
L	Spigot height	50	50	50
М	Gather height	300	300	700
N	Total height	817	817	1217

CHIMNEY TYPES

Studio 1

- · Class 1 brick built flue
 - a) Can be fitted without the optional flue gather if the chimney is sound.
 - b) If the optional gather is used, then it must be connected to a 7" flexible flue liner suitable for gas.
- Pre-fabricated 7" twin wall flue system suitable for gas
 - a) Must be fitted with the optional flue gather.

Studio 2 and 3

- · Class 1 brick built flue
 - a) Must be fitted with the flue gather.
- Pre-fabricated 7" twin wall flue system suitable for gas
 - a) Must be fitted with the flue gather.

Note: it is possible to install the Studio 2 and 3 into a Class 1 brick flue. However, this type of installation should only be undertaken by chimney specialists. This is because it will require the front wall and structure of the chimney breast to be extensively cut away to allow enough width to fit the fire and also provide access to the top of the gather to allow either:

- a) Connection of a 7" flexible flue liner suitable for gas
- b) Creation of a smooth transition between the top of the gather and the flue
