
INSTALLATION INSTRUCTIONS FOR MINI EXPANSION VESSEL KIT

WORCESTER 24, 26, 28CDi & BOSCH RX2

1. Switch off the electricity supply before commencing work.
2. Turn the cold water supply to the appliance off at the isolation valve and open a hot tap momentarily to relieve the pressure.
3. Remove the appliance front panel and the two screws securing the fascia and lower the fascia.
4. Unscrew the hexagonal plug from the body of the diverter valve.
5. Assemble the pipe assembly supplied in the kit to the mini expansion vessel using the fibre washer and connect the other end to the tapping on the diverter valve using the 6mm olive and nut supplied.
6. Turn on the cold water to the appliance and check for leaks.
7. Fasten the fascia in the correct position and replace the front panel.
